

## STATEMENT COVID-19 vaccination

### To our affiliates,

Since the first stage of vaccination against Covid-19 for health personnel began, the Clinic has managed, in parallel with MINSA, the possibility of vaccinating all of our **PlanSalud** affiliates. Unfortunately, despite the time that has elapsed, we have not had confirmation of the delivery date of the requested vaccines for all our members.

Subsequently, the Insurance Companies and EPS did a similar management to ours and included some Clinics that have their own insurance similar to **PlanSalud**; however, the expectation generated in society surpassed the real confirmation from MINSA to traditional insurers about the delivery of certain doses of vaccines to serve all private members.

It is important to note that, regardless of whether a person over 65 has a private health insurance, if this person is also affiliated to EsSalud, the latter is the institution that should vaccinate them, as provided by the MINSA.

Therefore, once we are certain that MINSA confirms and guarantees the distribution of vaccines, with the actual register of PlanSalud affiliates and the corresponding vaccine delivery schedule; we will inform this immediately, to proceed to vaccinate all our affiliates free of charge.
